The location is central yet pleasantly quiet, overlooking a large green area that provides abundant natural light and an open, spacious feeling throughout the day.

The apartments are designed with an eye for quality and functionality. You can choose from ground-floor and first-floor apartments with generous terraces, or luxurious penthouses with a private terrace and solarium. Each apartment includes a private parking space and storage unit in the underground garage, which is easily accessible by elevator. At the heart of the complex, a stylish communal pool with landscaped areas invites you to relax and socialize.

The penthouses are a real eye-catcher thanks to their spacious solariums, where you have the option of installing an outdoor kitchen and enjoying a complimentary jacuzzi. This creates an exclusive outdoor space perfect for relaxing or entertaining under the Mediterranean sun.

During construction, significant attention was paid to sustainability, energy efficiency, and a contemporary look. The homes feature an aerothermal hot water system, pre-installation for air conditioning and ducted heating, exterior carpentry with thermal breaks and double glazing, and fully fitted kitchens with appliances. The bathrooms are also stylishly finished, and both indoor and outdoor lighting are included, so you can immediately enjoy your new home without any worries.
